Mahjong Microsite: Design Meeting Notes (Meeting III)

What's Working

- Visual identity is coming along nicely, especially the scale shifts and color use
- Hierarchy is clear and effective
- Image use is strong, continue adding and using more
- The tile page and its opacity treatment work well
- The footer is a cool standout

Structure

- Cut the "Mahjong Around the World" section, as discussed
    - Combine the History and "What Is Mahjong" sections into a single page
- The home page doesn't read as a landing page
    - This can help by styling it differently from the other pages

Design Refinements

- Add hover effects so it's clear which page each link leads to
- Consider how the tile page scales down to different screen sizes
- Possibly explore motion effects
